Heavy Duty Hydraulic Chain Pullers

The Pulling hydraulic equipment consists of:

- 2 pulling devices with chain, each developing a pulling force of 300 tf;
- Hydraulic driving source that can simultaneously supply the two pulling devices with hydraulic oil under pressure.

Technical data:

Maximum pressure	250 bar
Working maximum	215 bar
Maximum debit	200l/min
Debit at maximum	112
Maximum pulling force	700 tf
Maximum working force	600 tf
Maximum working stroke	2000 mm
Installed power	59 kw
Supply voltage	380 V
Frequency	50 Hz

Applications:

- The equipment can be used both for recuperating the naval vessels wrecked or sunk and for other applications that require pulling forces up to 600 tf.
